The Olympus Mons class combat transports, Reid Fleming class deuterium tankers and Mercy class Hospital ships marked a return to the original cargo carrying role of the Bison design. However, unlike prewar designs these ships mounted light defensive armament. As UE Alliance forces went on the offensive in 2158, both classes helped establish a fast, reliable logistic trail from the core areas of UE space to the front lines.

The Olympus Mons class combat transport UES Ishtar Terra (APM-17) and the Reid Fleming class deuterium tanker UES DeMarco (AOM-53) are now on display at the Starfleet Museum.
